**IN THE CLIAMS**

For claim 9, the word "storage" is inserted after "readable".

For claim 10, the word "storage" is inserted after "readable".

**REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 9, 11, and 19, the Prior Art of record fails to show or render obvious each of the one or more shared risk link groups logically comprising two or more links, one of the two or more links being the failed link, and each link in a shared risk link group sharing a physical resource whose failure risks affecting all of the links and removing an adjacent node from the link state database for a link other than the failed link that is determined to be in one of the shared risk link group .in combinations set forth in the respective claims.

Regarding claims 5, 10, 15, and 20, the Prior Art of record fails to show or render obvious each of the one or more shared risk link groups logically comprising two or more links, one of the two or more links being the failed link, and each link in a shared risk link group sharing a physical resource whose failure risks affecting all of the links in the shared risk link group; determining the set of links S logically comprising all links belonging to the one or more shared risk links groups to which the failed link belongs; during computation of a shortest path first tree, after having added a node X to a path, adding each neighbor Ni of node X to a tentative tree if and only if a link (X, Ni) does not belong to S in combinations set forth in the respective claims.

Regarding claims 6 and 15, the Prior Art of record fails to show or render obvious each of the one or more shared risk link groups logically comprising two or more links, one of the two or more links being the failed link, and each link in a shared risk link group sharing a physical resource whose failure risks affecting all of the links in the shared risk link group; initiating computation of a shortest path first tree; adding a first node to a path as part of the computation; determining a set of neighbors of the first node; and adding each neighbor node

to a tentative tree if and only if a link between the first node and the neighbor node does not belong to one of the shared risk link groups in combinations set forth in the respective claims. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

### ***Conclusion***

  - b. Arrowood et al. (US 4,827,411) teaches a system for maintaining a topology database where the resources are removed based on a timer value.
  - c. Moriya et al. (US 2002/0012318) teaches a system for managing/setting a line route to satisfy a QoS requirement.
  - d. Pieda et al. (US 6,882,627 B2) teaches a system for selecting multiple paths taking into account shared risk.
  - e. Ishibashi et al. (US 2003/0147352 A1) teaches a system for establishing path of different fault recovery types in a communication network where multiple shared risk link groups are formed in the network.
